-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, claims 1-4 and 14-15, drawn to a filter having the technical features of a means for mounting the cartridge (a core) and a means for rotating the cartridge (vanes).
- Group II, claims 5 and 7, drawn to a filter having the technical features of a filter cartridge with a core and a float within the core.
- Group III, claim 6, drawn to a cartridge having technical features of a core and a float therein and a means for rotating the cartridge.
- Group IV, claim 8, drawn to a filter cartridge having technical features of a core and filter material surrounding the core and a float within the core.
- Group V, claims 9-11, drawn to a filter cartridge having technical features of a core and curved vanes outwardly of the core and filter material packed into depressions in the vanes.
- Group V1, claim 12, drawn to a filter cartridge having technical features of a first float and drain outlet including a second float, the floats having remote respective seats.
- Group VII, claim 13, drawn to a filter cartridge having technical features of a hollow core open at both ends and including a float therein and a filter material across the open lower end of the core.

2. The inventions listed as Groups I-V11 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

- Although each of Groups I-VII have the common technical features of a hollow core or a hollow core with a float therein, that technical feature is already known in the art of Conner

Art Unit: 1723

(U.S. 4,364,825) and is not a contribution over the art and therefore is not a *special* technical feature and unity is lacking among the groups.

- Although groups I, III, and VI include the common technical features of a means for rotating the cartridge (vanes), that feature is already known in the art of Mills et al. (U.S. 3,448,858). Therefore that feature does not define a contribution over the art and is therefore not a *special* technical feature such that unity is lacking among the groups.
- The other features are unique to the respective groups and are special technical features showing a lack of unity.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In

either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mr. Terry K. Cecil whose telephone number is (571) 272-1138. The examiner can normally be reached on 8:00a-4:30p M-F..
